Contractors Responsibilities

For sewer and projects, the contractor is responsible for excavation to the water main.

The contractor is responsible for the following;

- Traffic control
- Location and Clearance Report for utilities
- Cutting of Asphalt and concrete services
- Issuing of Notice to neighboring residents and businesses if warranted
- Supply and Installation of all sanitary and storm sewer materials to sewer main regardless of property line
- Supply and install all sewer line materials from building to sewer main
- Supply and installation of road gravels (18' type 2 and 12'type 1)
- Connection of service to main line (saddle type)
- Back flow prevention device on all sewer lateral lines
- The new lateral line must have camera or other tests to verify that the pipe is clean going into the Sewer Main.

Town Responsibilities

Town is responsible for the following;

- Reinstatement of the asphalt or concrete surfaces in Residential only
- Check the connection of service to main line
- Supply of gravel bedding materials where sewers are being removed or for new construction
