

Carolynn ROBERTS

What made you want to run in this special municipal election?

I had run in the 2024 election and had lost out on a councilor's position by just a few votes. When this opportunity came up, I remembered how much I had enjoyed campaigning and getting to know the community and their concerns. I still believe I'm able to bring experience and personality to making a positive contribution to the council and the town of Berwick.

What would you say is the job/purpose of a Town Councillor

I think the primary responsibility is to represent the interests and concerns of residents. This should be done in a positive and respectful manner to ensure transparency and for positive growth and change (when needed) can occur. Relationships are more important than problems and when focused on listening and working together, problems can more easily be resolved.

What issues or initiatives would you like to focus on during the remaining term of Council?

Budget and transparency are primary concerns at all levels of government and specifically at this moment in time. I think plans for long-term sustainability and growth while preserving why Berwick residents have chosen here to remain and live is essential. I believe strongly in positive and reciprocal communication and think this may be an area to develop. I think it is also time to review policies and by-laws and ensure they are easy for residents to access, understand and be applied. (For example "Dangerous Things" has not been amended since 1963!)

Why should constituents vote for you?

I am interested in learning as much as I can about any situation and finding solutions that can accommodate everyone as much as possible. I am not an advocate for being "stuck in the past", because it's only in learning from the past and communicating with each other that we can move forward. I bring with me many years of diverse experience at different levels of political governance, and at the heart, my active participation has always been solution-focused.
